# PRESSURE PUMPING

Our technology driven PRESSURE PUMPING SERVICES are designed to optimize the recovery of hydrocarbon reserves and generate optimal flow for producing wells. Everything we do is aimed at ensuring safe, successful performance to deliver a quality job for maximum productivity. Our company's mission is simply to be the best service provider in the industry.

## WE ARE A CUSTOMER ORIENTED COMPANY THAT IS FOCUSED ON THE WELL.

### **CEMENTING SERVICES INCLUDE**

- Surface, Intermediate, Liner, Long Sting Jobs
- Squeeze, Plug, Whipstock Jobs
- Custom Design Spacers and Cement Blends for any cementing application to 15,000 feet
- Density Control and Monitoring
- Cement Testing Lab
- QES has the experienced workforce and state of the art equipment to provide quality cementing services for a wide variety of well conditions.

## HYDRAULIC FRACTURING SERVICES OFFERED

- High rate slick water designs
- Cross-Link gel systems
- Linear gel systems
- Energized systems (N<sub>2</sub> and CO<sub>2</sub>)
- Acid fracturing (gelled and retarded systems)
- Full service lab for testing
- Suite of fluid systems and additives engineered for performance and environmental protection
- QES has the experienced workforce and state of the art equipment to provide quality stimulation services on a wide variety of well conditions up to 15,000 psi treating pressure.

## EQUIPMENT

- Satellite real-time job viewing
- 120 BPM Trailer Mounted Blender
- 100 BPM Hydration Blenders
- 2250 HHP Quinti-Plex Fracturing Pumps
- 2500 HHP Tri-Plex Fracturing Pumps
- Automated Chemical Additive Units
- Mobile Lab for On-site Testing
- Combo (blender/pump) Units
- 800 HHP Acid Frac Units
- Acid Pump/ Transport Units

QES provides a full line of Pressure Pumping Services across the Mid-Continent, Permian Basin and Rocky Mountain Region.

QES provides CEMENTING, ACIDIZING and HYDRAULIC FRACTURING SERVICES for horizontal and vertical wells. We combine the right personnel, equipment and design to meet each customer's objectives.

Additional services include a full line of CO<sub>2</sub> Product Supply and Pumping Services in the Permian Basin. Water Heating and Transfer Services are provided in the Rocky Mountain Region.

Quintana Energy Services LP is a growth-oriented company formed to provide a wide range of completion, production and drilling services to land-based exploration and production customers operating in unconventional resource plays and conventional basins throughout the U.S.
