

WIRELINE

QES Wireline specializes in delivering cased-hole wireline services to oil and gas exploration and production companies. Our goal is to provide safe, superior quality services to help increase the efficiency and profitability of our customer's operations.

COMMITMENT, QUALITY AND SERVICE

At QES Wireline every employee is committed to providing our customers with excellent job quality and superior customer service.

By offering a complete line of cased-hole wireline services, QES Wireline has the capabilities to deliver service quality that makes a difference on every well operation.

By recognizing and responding to the needs of our customers, QES Wireline has grown to become one of the largest independent wireline companies in the US and is committed to providing our customers with the support they need to deliver better wells.

CASED HOLE LOGGING

QES Wireline has solutions for all of your cased-hole logging requirements. Each one of our service districts offers a complete range of cased-hole logging services.

All logging services are available for critical/hostile well environments including: high pressure/high temperature, sour gas, high angle/deviated wellbore, and pump-down services.

QES Wireline knows that sometimes our customers need more than just wireline services. As part of our commitment to customer service, our field and support personnel are ready to advise you regarding specific logs, log interpretation, or to assist you with developing a logging program tailored to your well conditions or situation.

PIPE RECOVERY

Whether it's a stuck drill string or tubing that won't come out of the seals, QES Wireline has the people, the tools and the services to get you free.

We have some of the best pipe recovery specialists in the industry. Our specialist knowledge, combined with an understanding of local conditions, allows us to adapt to any situation and will allow you to return to safe, efficient operations.

PIPE RECOVERY SERVICES

- Free point services
- Stuck pipe log
- Back-off services
- Chemical cutters
- Jet cutters
- Circulating shots
- Severing tools
- Radial cutting torch

LOGGING SERVICES

- Formation evaluation
- Gamma ray
- Neutron
- Compensated neutron
- Pulsed neutron
- Carbon oxygen
- Water activation
- Cement bond log
- Dual receiver bond log
- Radial/sector bond log
- Large diameter casing bond log
- Casing evaluation
- Multi-finger caliper
- Magnetic thickness
- Production logging
- Temperature
- Flowmeter
- Array flowmeter
- Fluid density
- Tracer
- Injection profile
- Noise log
- Well integrity logging
- LeakPointSM
- FlowPointSM

PERFORATING, MECHANICAL SERVICES AND PRESSURE CONTROL

Perforating, Mechanical and Pressure Control Services are critical steps in any well program and QES Wireline offers a full range of perforating services and options to meet all drilling, completion and workover needs. QES Wireline also works directly with our suppliers to provide new or custom solutions to meet the specific requirements of our customers.

MECHANICAL SERVICES

- Depth determination
- Gauge ring/junk basket
- Setting services (bridge plug, packer, retainer)
- Dump bailer
- Hoisting services

PRESSURE CONTROL SERVICES

- 5K PSI rated PCE
- 10K PSI rated PCE
- 15K PSI rated PCE
- Trailer mounted equipment packages with redundant grease pumping capability
- 2.5" - 7" diameters

PERFORATING SERVICES

- Horizontal plug/perf services
- Stage perforating
- Pressure switch systems
- Addressable switch systems
- Casing gun systems
- Thru-tubing gun systems
- Circulating/drain hole
- Tubing conveyed perforating
- Electromagnetic oriented perforating
- Command tool release

SPECIALTY SERVICES

QES Wireline is a leading provider of specialty services to the oil and gas industry.

When results are critical, customers give us the call for staged frac work, production logs, RA tracer surveys, high pressure/high temperature logging & perforating, and high angle/pump-down services.

Working closely with our customers is one of the ways that we ensure the successful delivery of our specialty services. We can provide technical assistance developing a service program or dedicated equipment for multi-well projects.

As an innovator, QES is constantly developing new tools and services to make your specialty jobs easier, faster, and more economical.

SPECIALTY SERVICES

- Sour gas services
- High temp/pressure
- Production logging
- Injection profiling
- Reservoir monitoring
- Pump down services
- Tractor services
- Staged frac work
- Slickline services
- Point diagnostics
- Storage well logging

Quintana Energy Services LP is a growth-oriented company formed to provide a wide range of completion, production and drilling services to land-based exploration and production customers operating in unconventional resource plays and conventional basins throughout the U.S.
